

STEP 1: Prior to setting up your Link banner graphics, you'll want to pre-install your lights. Once the graphics are assembled it will be harder to install.

Light inserts here.
Choose either set, doesn't matter

STEP 2: Once poles are assembled into Link Banner Base, locate the holes on top of the segmented pole cap. Insert light into two of the 4 provided holes.

Y-split power plugs in here,
one on each side of the pole

STEP 3: For power connection, locate the side ports on the hanging bar cap.

STEP 4: Insert both plugs into either side and then plug into outlet.
